CRR(Crown-to-Root Ratio)

CRR : , 1:2 , 1:1.5 , 1:1

$$\text{CRR} = \frac{\text{Crown height}}{\text{Root length}}$$

Fig. 2 Landmarks used for crown-root ratio (CRR) measurements in mature (middle) and developing (right) teeth. a, cusp tip; b, root apex; c, cemento-enamel junction; d, crown height; e, root length

(Cemento-enamel junction, CEJ)
